Sentry Nano-Technology Redefines Protective Coatings

Superior Protection

Our coatings protect substrates which range from metals, stone, plastics, textiles, concrete to paint and anti-microbial additives. They bring innovative, cost-saving solutions to the hotels. These coatings are strong and easy to use.

Our proprietary nano-technology creates a granite-hard surface that provides superior resistance to damage caused by day-to-day use, and environmental hazards such as acid rain and bird waste.

Innovative Solutions

Sentry is dedicated to the goal of consistently exceeding customer expectations. Our strength is servicing customers who demand a lot from their suppliers. Sentry couples our problem resolution skills with an ability to support customers.

Sustainability Plus Safety

The importance of sustainability is demonstrated throughout Sentry. It's in every product.

Keeping the people who must use these coatings safe has been a major priority of ours since we began. Our coatings follow and beat the toughest environmental guidelines in the United States - the South Coastal Air Quality Management District.

No ... Not All Coatings are Alike

Mechanical Bond vs
Chemical Bond

Most coatings form a Mechanical Bond which does not become part of the surface.

However, the Chemical Bond that Sentry creates, bonds with the surface thus creating an entirely new, super protective surface.

The Nano-coating cannot delaminate because the coating and the surface have become one.

All our coatings are under 100 grams per liter VOC

Compare These Features & Benefits – You’ll Choose Sentry

PRODUCT	FEATURES & BENEFITS
Anti-Microbial Additive	<ul style="list-style-type: none"> Protects from bacteria including: e. Coli, MURSA
Metal Shield	<ul style="list-style-type: none"> Superior resistance to rust, moisture, corrosion, salt spray, acid rain, UV damage, oxidation, bird and animal waste Peel & flake resistant
Glass Shield	<ul style="list-style-type: none"> Reduces maintenance – cleaning with no harsh chemicals Makes mirrors water spot resistant Makes mirrors fog resistant Makes glass is so smooth it repels dust and dirt
Textile Shield	<ul style="list-style-type: none"> Protects from: Stains from food or liquid, stains from oil and grease, sun damage, flame Replaces Scotchguard® & Teflon®
Stone Shield	<ul style="list-style-type: none"> Superior barrier: moisture, stains, scratches Extends the life of stone, masonry and brick
Plastic Shield	<ul style="list-style-type: none"> Reduces oxidation, cracking & discoloring. Makes surfaces easier to clean
Stainless Steel	<ul style="list-style-type: none"> Repels fingerprints and smudges
ALL Sentry Coatings & Sealants	<ul style="list-style-type: none"> Durable Corrosion resistant UV resistant Chemically resistant Abrasion resistant Temperature resistant Air dries Extremely hard: granite hard Excellent adhesion to substrate Easy and convenient to apply Environmentally safe – zero to low VOC's High cross-link density internally High cross-link density with the substrate Creates highly smooth surface
